This article will go over everything you need to know about YTS 4k, including how to download Yif4k movies for free. In the past, it was tough to find 4k UHD movies, but now it's easier than ever thanks to streaming websites that don't offer such high-quality movies. Today, you can easily find 4k movies from torrent sites like Yify torrent as well as major video streaming sites such as YouTube, Vimeo, Dailymotion, VuDu, etc. Bonus Tip: The Best Software to Download 4K Movies Download 4k movies, 4k video songs, TV series, gaming videos, etc. from YouTube Download 4k videos via URLs from over 1000 websites Download movies in any resolutions, such as SD, HD, 4k, and 8k Batch download multiple 4k movies at the same time Save all your downloads as MP4, MP3, and WebM Download YouTube playlist with 1 click Superfast download speed Download the Free Trial of 4K Movie Downloader Here >> Quick Steps to Download 4K Movies: Step 1. Copy the link of a 4k movie. Step 2. Paste the link to the software. Step 3. Click the download button. What is YTS? YTS, short for YIFY Torrent Solutions, is a well-received torrent website. It covers an immense collection of 720p and 1080p films that are simple to watch and download. But the good times are not long. In October 2015, MPAA (Motion Picture Association of America) filed a lawsuit against YTS. It was accused of promoting and encouraging large-scale copyright infringement. As a result, YTS was closed permanently. What's the So-called YTS 4K Now? Although the original Yify torrent was blocked and not available, there are a plethora of mirrors and clones of YTS, such as yts.am, yts.pm, yts.ag, yts.mx, yts.unblockit.top, yts.unblocked.pub, etc. YTS.MX is one of the better known. These sites now contain 4k content, which we called it YTS 4k. For example, when you visit yts.mx, you will see a 4K column in the navigation bar. Click it and all the Yify 4k movies will be listed. But there are not many 4K (2160p) movies in yts.mx, let alone other mirrors and clones. Top 30 YTS 4K Movie List Here is the top 30 YTS 4k movie list. Some 4K movies might be upscaled from 2K & 1080p and digitally reproduced. To know whether your Yify 4k movies are real 4k or not, you can check them on the page: REAL or FAKE 4K. You should install a torrent client to download Yify 4k movies. The most popular one is the BitTorrent (abbreviated to BT). You can also give a try on qBitTorrent, Transmission, Vuze, Popcorn Time, or others. Step 1. Download and install BitTorrent on your computer. Step 2. Navigate to an available YTS proxy or mirror website, and find a YTS 4K movie you wish to download. Step 3. Click 2160p.BluRay or 2160p.WEB option to download the movie torrent. Step 4. Open the downloaded Yify torrent file with BitTorrent. Step 5. Specify a storage location, and click "OK". Step 6. The YTS 4k movie will be added to the list and start to download. Alternative to YTS 4K Movie Site #1. YouTube YouTube is a free video-hosting platform that makes it easy to upload and watch videos. It boasts a multitude of 4k movies. To look for your favorite ones, just search the movie titles with "4K" added to the end of your query. Or go to the "FILTER" and set the feature as "4K". Besides 4k movies, you can find any video you want on YouTube, including TV shows, episodes, music videos, etc. But there are some copyrighted videos that you have to pay for. #2. 4K-HD.Club Not the same as Yify 4k, it merely provides 4k movies. But you can only download one free 4k movie on takefile.link per day. And the download speed is very slow. If you desire to download more 4k movies at once, you have to upgrade to the Premium version, which costs 19.99/month and \$99.99/year. The Premium version limits to download 65GB 4k movies every 2 days. #3. 4K-Bluray.Club In spite of covering more 4k movies than YTS 4k, it doesn't offer free downloads. You need to purchase it VIP. \$4.9/month and \$24/year to download 4k movies. The VIP account is able to download unlimited torrent files. #4. The Pirate Bay The Pirate Bay is the largest and most used BitTorrent site, even older than Yify torrent. It enables you to download millions of movies, games, music, software, TV shows, and so on for free. But it contains only a handful of 4K content. YTS 4k and Alternatives, Which One to Choose? The original YTS was gone, and now the most clones of it are unofficial, including yts.mx. We are not sure when these clones get sued and shut down. So it's not a long-term solution to download 4k torrents from YTS. Although The Pirate Bay seems safe at the moment, torrent sites are always at risk of being closed. Moreover, free torrent sites merely encompass few 4k-movie resources. Both 4K-HD.Club and 4K-Bluray.Club are not free. 4K-HD.Club is too expensive and 4K-Bluray.Club does not provide free download opportunities. Even if you purchase the Premium version, you can only download their 4k movies, but not other content. As for YouTube, it delivers a vast assortment of videos you would like to download. There are no direct download links. But you can download YouTube 4k movies with iFunia YouTube Downloader. It offers 3 free download chances, and charge only \$19.99 for a lifetime license. Apart from YouTube, the software supports downloading 4k movies from 1000+ video sharing sites. How to Download 4K Movies from YouTube or Others? iFunia YouTube Downloader is an easy yet practical video downloader for Mac. Don't be fooled by its name! Besides YouTube, actually, it can download 4k videos (or any Yify 4k movies) from 1000+ websites, including Facebook, Vimeo, Dailymotion, Veoh, HTML5 videos, Twitch, Liveleak, Youku, and so on. With its intuitive interface, you can download YTS 4k movies within a few clicks. Step #1 Download, install and run iFunia YouTube Downloader on your Mac. Step #2 Open YouTube or other video sites on your browser and head to a 4k movie you intend to download. Step #3 The software will automatically recognize the video URL you copied and past it into the address column. Click the "+" button in the upper right corner to analyze the video. To add multiple 4k movies to the download list, you can: Repeat the process above (copy 4k movie URLs and add them one by one) Go to "File" > "Input URLs". Paste a list of 4k video URLs and click "OK". Step #4 Choose the output format, video quality, and path for the 4k movies. Click button to start 4k movie download. Final Words We have taken a closer look at YTS 4k as well as the way to download Yify torrents. Users around the world may be disappointed that the original Yify no longer works. All of us can only download YTS 4k movies from its mirrors and clones. But these torrent sites are not safe and stable. Why not download Yify 4k movies from YouTube, Vimeo, Dailymotion, etc. using a video downloader tool. Download YTS TV & Movies 720p, 1080p, Bluray, 2160p Movies Torrent YTS TV gives you pro level options to download YTS MX movies torrent and TV Series in Bluray 720p, 1080p, 4k and 2160 quality. It's the only one YTS website which provides TV Shows magnet urls and torrent. Download your favorite movies from huge database which is updating daily for your convenience. Please help us by sharing this site with your friends. Thanks! Note: ystsv.fun is the official domain of the YTS TV Shows & Yify Movies. Bookmark us now! YTS MX is another torrent movie site that allows users to download movies in quality formats. It allows you to download movies in 720p, 1080p, 2160p 4K, and 3D quality and one good thing is that you can get them in the smallest size. One of the reasons many people don't like downloading movies from some sites is because of the movie sizes. Well, this is understandable considering the fact that in some countries or regions, many people don't have access to a wifi network. They pay huge for data that they can use to access the internet. To keep everything in check, YTS MX has come with some nice quality format movies in the smallest size ever. The website contains many movies that you can download on your device. Without wasting much time, lets us see some of the features available on the YTS MX site. YTS MX Features The YTS MX is a nice website with a clean user interface. The website has been around for some years now. Yes, it was created in 2011, and to date, it's still active. This is unlike some sites that can easily be replaced and suspended because of copyright issues by their hosting. One thing I like about the site when I visited it is the clean user interface. There are no annoying popup ads that will disrupt your use of the site. However, it has a register button where you can register to have access to unlimited movies and TV series. However, if you are already a registered user, then you can simply log in to the site and then have access to any movies of your choice. The YTS is loaded with Korean movies, philippine movies, American movies, comedies, and many more. Just like Netflix, each movie you want to download always comes with the year of production. So if you are searching for the latest movies, you can always see their year of production before downloading them. You just have to look at the Popular categories and there you have the list of movies that were released this year. How to Download Movies on YTX MX Downloading movies on YTX MX is not that difficult. You can easily download movies on YTX even if you are not a tech geek or good with the internet. All you have to do is to create an account and then log in so that you can have access to more features on the site without any restriction. When you open the site and scroll down, you will see the warning that state that you should use VPN before downloading movies. Well, that is really recommendable. There are some available VPNs that are free while if you don't want them, then you can try some VPNs like expressVPN free trial and then use it to download from the YTX MX website. Once you have your VPN activated or installed on your device, the next is to create an account. Just click on the Register button, enter your email address, and username, and then choose your password. After that, you will be asked to verify your email address and then be taken to a login page. Just log in using the account details you created and then you can go ahead and continue your downloads. The YTX MX is very easy to navigate and download any movies you want. For example, you can use the Browse movie categories and then use the search term bar. Just enter the name of the movies you want to download and then select the Quality, select the Genre, select the Year, select the language and then select the order. If you don't want to follow all these procedures, you can just hit the search button after typing in the name of the movies you want to download, and then you will be shown the list of movies related to the term you search for their year of production. It is now left for you to select the one you want and then you can go ahead and download it. YTX MX Alternative When you search the term YTX MX on Google or any other search engine, you will be shown a list of movies that have YTX on them. Well, not all of them are the original YTX MS site. So don't just click on any link. But instead, make sure the website you are clicking at has this exact URL address. The domain authority of the website is 72 and it has monthly organic of 1.6 Million as of the time of writing this post with a total number of 9.8 Million backlinks. This along shows that the site is safe and good for downloading movies. So you have nothing to be afraid of. Nevertheless, there is still an alternative. Yes, there is some site that is similar to the YTX MX movies site where you can download movies. The good news is that some of the sites don't even need VPN to download from them. Below is the list of YTX MX alternatives. Conclusion: YTX MX as you can see is a nice website or a torrent site where you can download movies in high quality converted into a smaller size. I know that one of the questions in your mind right now is whether YTX MX is a legal site to download movies. The answer is simple. Most torrent sites if not all of them are illegal. Yes, this is because they upload copyrighted movies for free. If you are looking for a legal website to download or watch movies, then you should make use of Netflix and many others. However, YTX MX is safe for downloading Yify movies. You can make sure of the instruction provided in this article and download any movies of your choice on the YTX site. That being said while downloading movies, as a reminder, make sure your VPN is ON and make sure you have enough free space on your phone storage as well. You can always delete some movies you have watched before and download the new ones you want to watch again.
